

A solar power system

What is a solar power system?

The term "solar power system" includes any product or technology that runs on energy harnessed from the sun. This is typically self-contained, and universally renewable. This can also be as small as a solar-powered night torch, and can also grow to massive proportions like a solar-paneled roof that covers your entire property.

What is a solar panel system?

A solar panel system consists of multiple solar panels arranged to capture sunlight and convert it into usable electricity. These panels efficiently harness solar energy.
