Ancient photovoltaic panel factory market trend chart

There are discouraging trends to watch out for this year, from reduced net metering benefits to a lack of skilled workers, adding to the stress of higher financing costs for solar systems.

Find up-to-date statistics and facts on the global solar photovoltaic industry.

Utility-scale PV (UPV) had its largest-ever market share of new capacity additions in 2024, but deployment of UPV is expected to slow down due to grid congestion, curtailment, and ...

Overview by technology of different price points in January 2026, including the changes over the previous month: Only tax-free prices for photovoltaic modules are shown. The prices stated reflect ...

Challenges faced by traditional solar PV panel systems in the form of limited land availability and high grid installation costs are negated by the adoption of off-grid solar PV panels.

The Solar PV market shows moderate concentration: the top 10 module vendors shipped around 70% of volumes in 2025, yet power prices remain limited as global capacity exceeds demand.

Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system components. Prices are compiled from three sources: Nemet ...

The US solar PV and BESS sectors experienced historic growth in 2024 with 49GW of solar PV and 11.9GW of BESS added. Meanwhile, solar PV module manufacturing has surged to 52GW from just ...

The solar photovoltaic market size crossed USD 323.5 billion in 2025 and is expected to grow at a CAGR of 8.1% from 2026 to 2035, driven by integration of solar PV across agriculture and business ...

Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse and sustained growth of solar across the country.
