

As of Thursday, 13th March, the Air Astana Group has amped up its regulations regarding the safe transport of lithium batteries and battery-powered devices in flight.

In accordance with existing rules the maximum allowable battery capacity is 100Wh. Batteries with a capacity between 100Wh and 160Wh may only be transported with prior airline ...

Air Astana Group will implement stricter regulations on the transport of lithium batteries and battery-powered devices starting March 13, 2025, to further enhance flight safety.

In order to ensure safety, spare lithium batteries, accumulators, including power banks and their elements are allowed to be transported only in hand luggage or for freight transportation only.

Batteries with a capacity between 100Wh and 160Wh may only be transported with prior airline approval, and passengers are limited to carrying two batteries per person. The transportation ...

The transport of batteries exceeding 160Wh is prohibited. The capacity will be verified, and the transportation of batteries without capacity markings or proper certification is prohibited.
