Can I rent a rack in a data center?

Physical protection of racks. In the data center you can rent both: open and individually locked racks. You can get to the server hardware only if the lessee (owner of the hardware) issues a temporary code for short-term access.

What size machine room should a data center rent out?

Data centers rent out machine room areas of 60'x110 cm or 80'x120 cm (for deep server racks). This area can accommodate a server and peripherals with a total power of no more than 20 kW. For companies that operate a fleet of their own IT hardware: racks, servers, uninterruptible power supplies, PDUs - the rental cost is reduced.

How to calculate a data center rental cost?

Some data centers offer the client to calculate the rental cost on the calculator by himself, based on the number of required units, the estimated amount of power consumption, the location of the data center, the type of connection, the speed of Internet access without traffic limitation and the number of IPv4 addresses.

The Data Center Rack market is a subset of the larger Data Center industry. It is composed of companies that provide racks, cabinets, and other physical infrastructure for data centers.
