

Current status of solar power generation in Thailand

Adding 32GW of new solar capacity, plus 15GWh of batteries, to Thailand's power generation deployment targets could cut power generation costs by as much as US\$1.8 billion.

Thailand is making big moves toward a cleaner energy future. The government has quadrupled the annual quota for public solar power projects, from 100 MW to 400 MW in 2024, as ...

The Thai government has formalised the framework for a nationwide "Community-Based Solar Power Generation Project," targeting 1,500 megawatts of ground-mounted solar capacity as ...

In recent years, Thailand has seen a significant uptick in solar energy projects. These initiatives align with the government's ambitious commitment to renewables, which targets a 50 percent share in the ...

Solar energy in Thailand has crossed the line from a promise to a profitable imperative. Costs of renewable energy sources are now lower than those of coal and competitive with gas, with ...

Submit Energy Audit report to the client. A total of 328 Energy auditor licenses have been issued.

On October 27, 2025, Thailand's National Energy Policy Council (NEPC) approved the preliminary framework for the implementation of the "Community-based Solar Power Generation ...

Thailand's solar electricity production accounted for approximately 21.09% of total renewable energy generation and about 2.20% of the country's overall electricity production. These proportions ...

National PV Policy Thailand continued its roadmap to achieve carbon neutrality by 2050 and net zero emissions by 2065. In terms of power production, our National Energy Plan (NEP) has set the target ...

The study focuses on the power sector, including both the supply side (electricity generation) and the demand side (electricity consumption in the residential, commercial, industrial, and transportation ...
