

Douyin installs photovoltaic panels

China is on track to set a new record for photovoltaic solar power installations in 2024, driven by falling production costs and increased global interest in renewable energy, said industry ...

The quick summary: China installed an unprecedented 93 gigawatts of solar and 26 gigawatts of wind capacity in May 2025 alone, significantly accelerating the global transition to ...

China expands solar energy at record speed--adding nearly 100 panels per second as new capacity hits 1.08 TW by May 2025. Discover what's fueling this green-energy surge.

China's solar panel installations surged in the first half of the year as developers sought to complete projects before the new policy, which removed a guaranteed rate of return, took effect.

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target....

A homeowner in China recently took to Douyin, the Chinese counterpart of TikTok, to share his experience investing in a rooftop solar power system.

Trinasolar, in collaboration with Monash University Clayton Campus in Australia, used Vertex N Black Transparent Aesthetic Modules to build a PV carport with a total capacity of 722.4kw, sending green ...

On September 19th, ByteDance announced a sourcing announcement for the Douyin Group data center wind, solar, and storage microgrid energy management contract.

China is expected to be the primary source of key building blocks for solar panel production through 2025, with its share of global polysilicon, ingot, and wafer production expected to ...

PV installations in China surge in the next 3 years? Rooftop solar PV installations in China may surge in the next three years as the country goes through a green energy transition and plans to make ...
