

France's wind energy sector is on a strong growth trajectory, with 23.8 GW of installed capacity as of mid-2024, including 1.5 GW of offshore wind. While onshore wind remains dominant, offshore wind is ...

The PPE also sets targets for 2028, ranging from 33.2 to 34.7 GW for onshore wind power capacity and between 5.2 and 6.2 GW for offshore wind power capacity. Finally, the PPE includes a schedule for ...

Here above you will access information on wind energy forecast for the French grid : Reference forecast : generation forecasted available since 6:00 PM for the complete day ahead.

OverviewPublic opinionTimeline of developmentsFuture projectionsOffshore auctionsSee alsoPublic opinion of wind power developments has remained quite popular among the French public. A 2021 Harris Interactive survey shows that 76% of the French public have a positive view of wind power. This survey also shows that 77% of the French public living within five kilometers of a wind farm have a positive view of wind power. This is backed up by a 2021 IFOP survey, which shows that 77% of the public has a positive view.

Wind power was one of the leading electricity sources in France, with over 50 terawatt-hours generated in 2023, placing France among the most important wind power producers in the...

This graph gives an annual and monthly overview of the evolution of the wind power capacity (total installed capacity and growth), both overall and by sub-sector: onshore wind power, offshore wind ...

Wind energy is rapidly becoming one of the most vital components of France's renewable energy landscape. With its favorable wind conditions, extensive coastline, and strong governmental support, ...

The strong belief in wind energy being a viable source of energy in the future and the strong political salience of the energy transition, together, explain why many in the French public support the ...

Data and information about Wind power plants and their location plotted on an interactive map of France.

French companies' recognised expertise in both onshore and offshore wind is central to France's appeal. The wind energy industry is experiencing steady growth, driven by regular ...

Installed capacity is forecast to increase from 2024 to 2035, at which point wind power is expected to account for 19% of total installed generation capacity. Onshore wind power capacity rose ...
