Learn how to build a DIY generator enclosure to protect your generator with our step-by-step guide. Perfect for DIY & Crafts enthusiasts.

Portable Generator Enclosure Plans Building A Portable Generator Shed Building The Wall Frames Attaching The Siding Sheets Next, you need to assemble the wall frames for the generator shed. Use 2x4 lumber and 1/2" plywood for the header. Add glue to the joints and insert 2 1/2" screws to lock the components together tightly. Align the edges with attention, so they are flush before inserting the screws. In addition, drill pilot holes before inserting the screws to prevent splitting. See more on my outdoor plans Amazon Porch Shield Waterproof Generator Cover - Amazon Upgrade Material - Made of 600D polyester fabric with water-resistant laminated undercoating.
