

Georgia Mobile Power Station Generator

What's new at Georgia Power?

Georgia Power recently received delivery of the latest major components - including the turbine and generator - to complete the new Unit 9 combustion turbine (CT). Each new Plant Yates CT includes a state-of-the-art Mitsubishi Power M501JAC simple-cycle gas combustion turbine and a Mitsubishi Electric Power VP-X Series turbine generator.

Why should you buy a home generator in Georgia?

A powerful home generator can mean the difference between riding out a storm and its aftermath or sitting in the dark without air conditioning, appliances, or even necessary medical equipment. GenSpring Power is helping families in Georgia keep the lights on with our collection of American-made home generators from Kohler and Briggs & Stratton.

What is the oldest power plant in Georgia?

As one of Georgia's oldest generation sites, beginning commercial operation in 1950, Plant Yates was the first Georgia Power plant built to support the post-World War II economic boom. In 2014, five of the seven coal-fired units were decommissioned, with the remaining two converted to natural gas generation.

What type of energy does Georgia Power use?

Committed to delivering clean, safe, reliable and affordable energy, Georgia Power maintains a diverse, innovative generation mix that includes nuclear, coal and natural gas, as well as renewables such as solar, hydroelectric and wind.

Through traditional home generators, innovative energy storage systems, and groundbreaking hybrid power systems, GenSpring is ready to power your home when the lights go out in Georgia. As North ...
