

I regret installing photovoltaic panels in a farmhouse

Why do homeowners regret installing solar panels?

Low-quality or poor-standard panels may cause more problems than they solve. Solar panel manufacturers often promise high output levels for their products. However, if these promises aren't met due to inferior materials or manufacturing processes, it's easy to see why homeowners regret installing solar.

Should I DIY my solar panel installation?

If you choose to DIY your solar panel installation, the least you should do is have a technician inspect the roof and assess how many more years there are in it. As a rule of thumb, if your roof is in decent shape and is likely to keep your head dry for another 15-20 years, go ahead and panel it up.

Can HOAs veto solar plans?

Where they exist, HOAs (Homeowners' Associations) do have a say in almost every and any public or publicly visible aspect of your life. That means they can veto your solar plans as well. However, that's about to change where it hasn't already. And in most states, it's already changed with the introduction of the so-called "Solar Rights Laws."

Can solar panels rain on a solar parade?

Solar panel installation might seem like a breeze, but there are common challenges that can rain on your solar parade. One such challenge is the positioning of the panels for optimal sunlight coverage. Installing solar panels isn't just about slapping them onto your roof anywhere you please.

Are you using your Enphase monitoring? You'll want that to make sure things are working properly. With Micro Inverters, " or wire the panels differently? (series vs parallel) ", this isn't ...
