

Irish steel energy storage project

Statkraft delivered the first energy storage project in Ireland with Fluence in 2020, at its Kilathmoy wind farm and the company has continued to have a strong presence in the Irish energy ...

Energy storage systems are vital to Ireland's renewable ambitions. Learn how batteries, long-duration storage and grid upgrades will help deliver clean power

We work together to promote the benefits of energy storage and we engage with policy makers to support and facilitate the development of energy storage, which is pivotal to decarbonising Ireland's ...

Ireland could host Europe's first large-scale, iron-air project southwest of Buncrana town in Donegal County. The 10 MW facility proposed by FuturEnergy Ireland will be capable of storing 1 ...

FuturEnergy Ireland is proposing to use an iron-air battery capable of storing energy for up to 100 hours at around one-tenth the cost of lithium ion across the battery energy storage portfolio.

FuturEnergy Ireland, a joint venture between Coillte and ESB, has been granted planning permission to build Europe's first iron-air battery facility, a new technology that promises to store...

The proposed Ballynahone Energy Storage project, the first of its kind in Europe, is designed to use iron-air battery technology capable of discharging energy at its full power output for ...

An artist's impression of the planned Ballynahone Energy Storage plant in Donegal. The proposed concept will be the first battery storage project of its kind in Europe.

Statkraft, the largest producer of renewable energy in Europe, has launched Ireland's first ever four-hour grid-scale Battery Energy Storage System beside its windfarm at Cushaling in Co Offaly.

The Kestrel Project has embarked upon an integrated Irish energy system modelling and defined storage requirements for renewable gas and green hydrogen, from today through to 2050.
