

Jinchen's automated production lines are like Tesla's Gigafactories for solar panels. Their flagship JHX8000 series laminators can process 1.2MW components daily - enough to power 400 ...

2 Heterojunction (HJT) solar cell PECVD solution 3 Solar cell injection machine 4 PL& PE Machine 5 AOI testing equipment for solar cell 6 Silicon wafer crack detection system 7 Diffusion / Thermal oxide / ...

Jinchen, a PV equipment supplier, said that it has secured approval from the Shanghai Stock Exchange (SSE) for a private placement of A-shares. Jinchen plans to issue 22,527,596 A ...

Singulus Technologies AG and Yingkou Jinchen Machinery Co Ltd have formed a joint venture, Singulus Solar GmbH, to offer PV module production lines and cell equipment for the global ...

The Malaysian subsidiary represents another key milestone in Jinchen's global expansion strategy. It will be responsible for the localized production, sales, and technical services of PV ...

28 years equipment manufacturing and process development experiences by PV industry, 4 R& D Centers with 400 R& D Workers cover all the key steps of Cell and Module ...

In addition to laminators, JINCHEN offers a variety of other solar production equipment, including tabber and stringer machines, busbar welding machines, and solar cell testers.

1 PERTOP high-efficiency solar cell tube PECVD solutions 2 Heterojunction (HJT) solar cell PECVD solution 3 Automatic taping machine 4 PV module Automatic fitting paper corner protector 5 Junction ...

Solar module manufacturing equipment specialist Yingkou Jinchen Machinery (Jinchen) and Future Solar have entered into a partnership wherein Jinchen will supply 3.2 GW of high-speed ...

Chinese solar module production equipment producer Yingkou Jinchen Machinery Co., Ltd. has announced it aims to invest RMB 285 million (\$40 million) to build 40 sets of heterojunction ...
