

Jordan tesla solar roof

Does Tesla have a solar roof?

With the Tesla app, you can monitor your energy production in real time. Control your system from anywhere with instant alerts and remote access. Built with all-weather durability, Solar Roof consistently generates energy for years, maximizing your solar investment over time. Learn more about Solar Roof.

Does a Tesla Powerwall work with a solar roof?

The Tesla Powerwall battery, though sold separately, is a vital component that works perfectly with the Solar Roof system. This home battery stores extra energy produced during sunny days to use at night or during blackouts. A single Powerwall unit stores 13.5 kWh of energy. Homes needing more power can stack multiple units.

How much energy does a Tesla Solar Roof use?

The Tesla Solar Roof looks like a normal roof from the street--you can't tell the solar tiles from regular ones. But this sleek design affects how well it works. Each Tesla Solar Roof tile makes about 71.67 watts, nowhere near as much as traditional panels that produce 170 to 350 watts each.

Is the Tesla Solar Roof still alive?

Tesla aimed for the solution to be competitive with higher-end roofing options, but it remains expensive and much less affordable than many durable roof options, plus solar panels. In short, the Tesla Solar Roof is still alive, but it's nowhere near the revolutionary product Tesla claimed it would be.
