

Louis Port PV IP55 Outdoor Cabinet DC Financing Solution

Outdoor cabinets are for use whenever maximum protection is a must. The anti-vandalism qualities provides protection against electromagnetic radiation and conditions of high heat.

Rooftop Easy retrofit with including AC coupling interconnection port up to 2X solar capacity or DC-couple directly onto the inverter

Outdoor Lead Acid Battery Cabinet mainly provides a stable working temperature and dust-free environment for lead acid battery, they are integrated with thermal insulation and equipped with air ...

The cabinet provides an enclosure that is weather-tight for servers, batteries, inverters and telecommunication equipment with dual AC and DC power inputs/outputs to support different loads.

We Provide outdoor cabinet range provides single or multi-chamber, temperature controlled secure environment for valuable sensitive communications, electronic & electrical equipment, in a cost ...

Both the 30K and 60K are stackable to 10 units of high voltage battery bank options, increasing project size and site flexibility. A multi-use port provides flexible interconnect to a variety of devices, ...

The Flatpack2 outdoor power system provides solution for the most outdoor demanding applications with total power output up to 36kW DC load in IP55 enclosure.

Cabinets are available with integrated thermal management using either a fan and filter combination or air conditioner to control internal temperatures for protecting sensitive 19" rack equipment from water ...

The cabinet is an ideal solution for physical connections of outdoor telecommunication equipment, transmission equipment, power equipment, monitoring equipment, lithium batteries and other ...

Built with a strong frame, the side panels feature a double-layer structure with a 1" void to help with heat transfer and meets GB4208-93 standard and IP55 (water/dust ingress) while providing ventilation.
