

Enter the Yaskopje Energy Storage Project, North Macedonia's answer to the global energy puzzle. Nestled in the Balkans, this 325MW/1300MWh battery behemoth isn't just storing electrons; it's ...

The \$85 million project - currently Europe's largest privately-owned battery installation - represents a staggering 40% of North Macedonia's total grid flexibility capacity.

North Macedonia is taking a monumental step forward in its green energy transition, officially approving plans for over 4 GW of new renewable energy and storage capacity slated for development by 2026.

Energy storage systems (ESSs) can help make the most of the opportunities and mitigate the potential challenges. Hence, the installed capacity of ESSs is rapidly increasing, both in front-of ...

That's the promise of the Skopje Energy Storage Project - North Macedonia's answer to the \$33 billion global energy storage industry [1]. Designed for tech-savvy policymakers and ...

The 2.6 MW BESS projects are just the start of battery storage in the country with YESS Power, a Turkey-based contractor, planning to commission a 60 MW BESS project in North ...

In a recent interview, North Macedonia's Minister of Energy, Mining and Minerals Sanja Bozinovska said projects are under development for battery energy storage systems (BESS) and ...

North Macedonia's home energy storage production base combines cost efficiency, market access, and sustainability - three pillars for success in today's renewable energy race.

A new energy law adopted in May 2025 is expected to further accelerate the uptake of battery storage. State-led solar and wind projects, along with investments in grid infrastructure and ...

Meanwhile, FeroInvest is continuing to expand its integrated model of electricity production, storage and optimisation, positioning battery systems as a central component of North Macedonia's ...
