What is microgrid certification training?

Microgrid Certification Training curriculum is a leading-edge certification and relevant to what is happening in the energy industry right now. Microgrid technology is an advanced technology developed in recent years as a critical competence of traditional power networks with reliable and efficient operation across a wide range of industries.

How long does it take to get a microgrid certification?

4 Days, 7-8 hours a day. Microgrid Certification Training curriculum is a leading-edge certification and relevant to what is happening in the energy industry right now.

Why should you take microgrid training?

By taking microgrid training by TONEX, you will be able to understand the main components of a microgrid, main operating modes for microgrids regardless of connection to the grid or islanded mode operation, tackle the operating problems of microgrids and direct to the right solution if there is any fault.

What is a microgrid certificate?

This certificate is divided into three main topics in microgrids which will help engineers and scientists to prepare themselves with the skills and required confidence to meet their organization's needs or position themselves for their job responsibilities and promotions.

This training program is designed to delve quickly into the technical and financial benefits of renewable energy systems from an unbiased viewpoint. The instructor will introduce the critical fundamentals of energy and the ...
