

Natural disaster insurance for photovoltaic panels

What types of insurance do solar panels need?

The primary types of insurance include property insurance, liability insurance, and performance insurance. Property insurance covers physical damage to the solar panels and associated equipment due to incidents like theft, vandalism, or natural disasters.

Does property insurance cover solar panels?

Property insurance covers physical damage to the solar panels and associated equipment due to incidents like theft, vandalism, or natural disasters. This type ensures that in the event of damage, repair or replacement costs are mitigated, safeguarding the financial interests of the property owner.

Why is insurance important for photovoltaic plant operations?

Insurance is important to several aspects of photovoltaic (PV) plant operations. Insurance is often a prerequisite for financing, operating permits, interconnection agreements, and leases or as part of a power purchase agreement for an on-site PV system. The history of insurance for PV systems is short compared to other types of assets.

Does homeowners insurance cover a PV system?

For residential photovoltaic (PV) systems, homeowners' insurance extends property coverage to the PV array and liability coverage to bodily injury to others or damage to the property of others that occurs as a result of the system.
