

Nordic delivers world-class hardware, embedded software, development tools, power management, world-class support, and cloud lifecycle services - all simplifying development for developers to build ...

Micro inverters eliminate this constraint through distributed maximum power point tracking (MPPT), converting DC to AC at each panel independently--particularly critical for ...

Our solar inverters are equipped with the latest technology to optimize power conversion and minimize energy loss. This ensures that our clients can enjoy the full benefits of their solar power systems, ...

Nordic news Nordic shares product and business related news to inform and inspire. Get new perspective, industry news, product updates and more.

Nordic Semiconductor, a global leader in low-power wireless connectivity solutions, is bringing AI intelligence and functionality to the smallest battery-powered IoT devices.

Microinverters convert the electricity from your solar panels into usable electricity. Unlike centralized string inverters, which are typically responsible for an entire solar panel system, ...

Nordic Semiconductor is a global leader in low power wireless connectivity solutions, providing the essential platform and wireless technologies that connect IoT devices within the consumer, ...

Solar panels get all the glory, but it's the micro-inverters that do all the work, unlike the conventional inverters, micro-inverters provide flexibility and optimization for your photovoltaic system.

Microinverters convert the electricity from your solar panels ...

Cloud Services The cloud services optimized for ultra-low power Nordic Semiconductor wireless devices
Cloud Services Overview Location Services Security Services Device Management Device ...

The APsystems microinverter solution combines highly efficient solar harvesting and power conversion with our high-tech data collection and communication program - giving you real-time performance ...

Nordic Semiconductor, a global leader in low-power wireless connectivity solutions, today announces the acquisition of its long-term partner, Memfault Inc., the market-leading cloud platform provider for ...

The nRF54L Series provides this outstanding processing performance with Nordic's proprietary technologies, a unique design approach, and pioneering progression to the low-leakage 22nm ...

Nordic Microinverter

Nordic Semiconductor, a global leader in low-power wireless connectivity solutions, today announces the launch of the nRF9151 SMA Development Kit (DK), a specialized DK for RF engineers ...

The "IDR01" is based on Nordic's nRF54L15, that doubles the processing power and triples the processing efficiency of the previous generation of SoCs, enabling the smart ring to combine a host ...

Unlike traditional string inverters that handle multiple panels, each microinverter is attached directly to one solar panel (or sometimes 2-4 panels), allowing for independent operation ...
