

Now the country stops purchasing solar photovoltaic power generation

Federal agencies are delaying approvals for renewable energy projects on both federal land and private property at a time when electricity demand is going up.

Delays in solar project schedules tend to be relatively short in duration, and reports of delays are more common than cancellations: less than 1% of planned solar capacity is entirely ...

More than \$14 billion in clean energy investments in the U.S. have been canceled or delayed this year, according to an analysis released Thursday, as President Donald Trump's pending megabill has ...

Right now, U.S. manufacturers do not produce enough solar panels to meet the nation's demand, but industry investments and federal tax incentives have been making progress, though ...

US solar boomed in Q1 2025, but new tariffs and House-passed tax credit cuts threaten jobs, factories, and energy security.

o The United States, despite being a leading PV market, is below the global average of other leading markets in terms of PV generation as a percentage of total country electricity ...

The US solar industry faces a complex and evolving trade and policy landscape that will significantly impact development over the next five years. The Trump administration implemented ...

Starting with the direct tax implications of HR 1, this strategy of energy subtraction has undermined solar and storage projects across the country. The Department of Energy has cancelled...

President Donald Trump on Wednesday said his administration will not approve solar or wind power projects, even as electricity demand is outpacing the supply in some parts of the U.S.

Since taking office, the Trump Administration has paused permits on all new wind and solar projects on public land, both onshore and offshore. New wind and solar power installations, and ...
