

Outsourced battery pack processing

Leveraging our expertise and state-of-the-art equipment, we help you design a solution that precisely meets your battery's unique requirements, whether it's a large-scale battery system or a small battery ...

Our methodology ensures every custom lithium-ion battery pack - from ultra-low-temperature 18650 configurations to high-voltage LiFePO4 arrays - delivers uncompromised ...

From mechanical and electrical design to BMS integration, as well as support through regulatory compliance and the transition to final assembly, custom battery manufacturers provide a ...

We offer battery cells to customers as well as customized pack solutions. Our sales, engineers and production personnel work closely with customers to design, build and manage high performance ...

Outsourcing the manufacturing of your electronic device's power solution or battery pack requires a trusted partner that can guide you through every step of the process. With over 40 years of ...

With over 15 years of experience in battery manufacturing, we have established ourselves as experts in battery assembly solutions, especially module and pack. In our portfolio you will find solutions for all ...

From mechanical and electrical design to BMS integration and regulatory compliance, custom pack manufacturers support mid-volume production with engineering-led services.

In this comprehensive technical guide, I'll share an in-depth look at our end-to-end custom lithium battery pack manufacturing process.

Learn the complete battery pack manufacturing process, from cell selection to final assembly.

Our turnkey lithium battery module PACK production line provides a complete solution, covering every stage from cell sorting, module assembly, and welding to inspection and packaging.
