

Philippines grid-side energy storage power station project

The Philippine Department of Energy (DOE) has cleared 21 battery energy storage system (BESS) projects for system impact studies (SIS) with the National Grid Corporation of the ...

Long overlooked as an energy powerhouse, the country is now making waves with pumped-storage hydroelectric power (PSHP), drawing in billions from some of its wealthiest clans.

Meralco PowerGen Corp. (MGen) is set to roll out a 49 MW battery energy storage system (BESS) in Toledo, Cebu, with 25 MW to be delivered by 2026. The project aims to support grid ...

Unlike standalone renewable energy ventures, this project retrofits an existing oil-fired power plant. The BESS installation will help stabilize the grid by storing surplus electricity during low-demand periods ...

The Department of Energy (DOE) of the Philippines endorsed 17 power generation projects to the National Grid Corporation of the Philippines (NGCP) in June 2025, highlighting the ...

The Energy Regulatory Commission (ERC) said over the weekend it approved point-to-point transmission projects for five renewable energy projects, with a combined capacity of 569.384 ...

Seeks to assess and advance PSH as a stand-alone ESS to support the country's renewable energy and grid stability goals through site identification, market assessment, and ...

The awarded project will make a vital contribution to the Philippines' renewable energy infrastructure, particularly for the Panay sub-grid. Battery energy storage systems are essential for ...

Recently, the highly anticipated MTerra Solar project, the largest solar-storage initiative in the Philippines, secured grid connection approval from the Energy Regulatory Commission (ERC).

The power generation arm of the Philippines' largest private electric distribution provider, Manila Electric Company (Meralco), is developing its second large-scale battery storage project.
