

Photovoltaic Energy Storage Power Supply Purchase Contract

What is a solar power purchase agreement (SPPA)?

A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider for a predetermined period.

What is a corporate power purchase agreement (CPPA)?

Corporate Power Purchase Agreements (CPPA) offer companies an effective way to meet electricity needs with renewable energy, reducing exposure to wholesale market price volatility. However, the risks associated with these contracts vary depending on their structure, specifically the combination of electricity profile and price structure.

How can solar power be stored & fed into the grid?

Through the targeted use of storage systems, solar power or electricity from wind turbines, for example, can be stored at times of low value and fed into the grid at a later, economically more favourable time. This enables a more flexible supply of electricity and better adaptation to consumption.

What is a solar services provider (SPPA)?

This framework is referred to as the ‘solar services’ model, and the developers who offer SPPAs are known as solar services providers.

Power purchase agreement (PPA): A contract allowing the customer to avoid making upfront capital investments for the project and operating responsibilities. A PPA uses third-party ...

What Is A Solar Power Purchase Agreement (Sppa)?How Do SPPAS Work?Sppas, Renewable Energy Certificates, and Green Power Partnership EligibilityAdditional ResourcesA Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider for a predetermined period.
