

Photovoltaic panel straight tube light

Solatube skylights collect solar energy during the day with a small photovoltaic panel installed inside the tube. When darkness falls, the stored energy powers a soft, diffused light that ...

Solar tubes minimize exposure to direct sunlight or UV rays as many would put it, making them quite ideal in cases where there is sensitivity to direct exposure in the home, but at the same time, they ...

Want to flood your home with natural light? These top-rated solar tubes deliver stunning illumination while slashing energy costs.

Solar tubes, also known as "sun tunnels", "light tubes", and "daylight pipes", channel outside daylight into your home. While they don't allow for a nice view of the outside world, they do provide a natural, cost ...

Fewer Options For Control Offer Little Design Improvement Not Equally Suited to Every Home The type of roof you have might make it impractical to install solar tubes. Most solar tubes are designed for roofs with a slope between 15 and 60 degrees. If you have a flat roof, you'll need to look for tubular skylight models specifically designed for this type of roof. On a steeply pitched roof, such as an A-frame, installation might not be possible. See more on today's homeowner.
