

Portable level 2 ev charger

Which EV charger is right for You?

Ideal for electric vehicle owners who need flexibility, the Portable Level 1 and Level 2 EV Charger with a 26ft charging cable offers a versatile solution for home and on-the-go charging. This compact charger supports both Level 1 and Level 2 charging, delivering up to 32A at 240V for rapid charging --24 miles in just one hour.

What is a Level 2 EV charger?

Level 2 EV chargers offer different charging speeds, which is largely a product of how much amperage they can draw. The higher the amperage the higher the speed. But higher amperage units are likely to cost more. You're also limited by your circuit breaker.

Which EV charger is best?

Mustart's 40-amp Level 2 EV charger is one of the best value units on offer. It offers super-fast 40-amp charging -- about 2.5 times faster than a 16-amp Level 2 charger -- without jacking up the price. It has a digital display with several different data points in addition to LED indicators.

Is level 2 charging faster than Level 1 charging?

Obviously, the Level 2 charging would be faster, but at least you have the option for Level 1 if you don't always have the right socket pattern for Level 2 charging. Incidentally, the Level 2 charger is up to 3 times faster than the EV's original charger. The plugs are compatible with all major EV automakers and multiple power sources.
