

Price of solar modules in the EU

How much do solar panels cost in Europe?

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to EUR0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall.

How much does a solar module cost in 2025?

Specifically, in August 2025, the Price Index showed: about EUR0.055/Wp for low-cost photovoltaic modules, unchanged from July prices. "Manufacturers are moving quickly to end the devastating price war. The Chinese government is gradually phasing out tax incentives and subsidized solar module exports.

Will EU-made solar modules be more expensive than Chinese imports?

A report by SolarPower Europe and Fraunhofer ISE finds EU-made solar modules cost EUR0.103 (\$0.12)/W more than Chinese imports, but targeted policies could close the gap and help reach the EU's 30GW annual manufacturing target by 2030.

How much does a photovoltaic module cost?

Mainstream Modules: Average price of EUR0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of EUR0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.

Maysun Solar focuses on high-efficiency PV module technology and supply for the European market, covering TOPCon modules, IBC modules, and HJT modules with power ratings ...

Expert view - a solar market in motion Outlook for the coming months With a PMI of 70 and tightening module supplies, the European solar market stands at a pivotal moment. Rising prices ...

Image: JinkoSolar Solar module prices in Europe have risen after months of decline, driven by price increases from Chinese manufacturers and a tight supply of popular modules in the ...

Introduction In the second half of 2025, the European solar market stands at a pivotal turning point where policy, pricing, and technology converge. Over the past 18 months, the global ...

However, the price increase for n-type monofacial or bifacial modules is still lower than the peak of the past 12 months, when the average price of bifacial n-type modules approached ...

Updated photovoltaic module prices 2025: in August, high-efficiency solar panels fell to an average of EUR0.12/Wp in Europe.

PRICE INDEX | January 2026 Photovoltaic Price Index Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main ...

Price of solar modules in the EU

Future Outlook for European PV module prices The stabilization of PV module prices in October 2025 is an encouraging sign for the European solar industry, but stakeholders remain ...

A report by SolarPower Europe and Fraunhofer ISE finds EU-made solar modules cost EUR0.103 (\$0.12)/W more than Chinese imports, but targeted policies could close the gap and help ...

The average price of several types of solar PV modules remained stable in Europe in November, according to sun.store.
