

San Jose's energy independence

With the completion of the proposed facility, San Jose would become the first city in the states with such capabilities. And we can only hope that other cities across the nation will adopt such facilities in the ...

As San Jose plans for growth to the north and downtown areas, Deputy City Manager Kip Harkness said in a recent memo that breakthroughs in talks with power giant PG& E could ...

Despite its historically fraught relationship with PG& E, San Jose is inching toward an agreement that would hold the utility provider more accountable by requiring concrete, enforceable...

The San Jose City Council voted last week to take the next step in reviewing a microgrid planned by Google, giving Mayor Sam Liccardo another victory in his quest for city energy...

San Jose and PG& E are preparing massive grid upgrades, but AI demand could nearly triple the city's energy use.

As San Jose continues to study the feasibility of creating its own utility to service future growth areas, PG& E has proposed an agreement with the city to build out its grid amid concerns over...

As part of Tuesday's vote, the city will also apply to tap into a new transmission line that's set to come online in 2028 and become the foundation of the San Jose Power.

The San Jose City Council voted this week to take the next step in reviewing a microgrid planned by Google, giving Mayor Sam Liccardo another victory in his quest for city energy ...

City Council unanimously approved the creation of San Jose's Power in 2023. The decision allows the Energy Department to explore tapping into two high voltage transmission lines set to run through the ...
