

Utility-scale solar power capacity in China reached more than 880 gigawatts (GW) in 2024, according to China's National Energy Administration. China has more utility-scale solar than ...

The NEA data released Monday showed that China's renewable energy sector added a new installed capacity of 373 million kilowatts in 2024, representing a year-on-year increase of 23 ...

Solar power generation capacity amounted to 1.12 billion kilowatts by the end of last month, surging 48.5 percent compared to the same period last year, according to the National ...

The report provides a comprehensive overview of PV market development, policy frameworks, industrial trends, and technological progress in China during 2024. In 2024, China added 277.57 GWAC of ...

China installed a record 315 GW (AC) of new solar capacity in 2025, lifting cumulative installed PV capacity to 1.2 TW and pushing non-fossil power sources past thermal generation for the...

China power statistics - April 2025 In the first four months of the year, wind and solar power generation capacity accounted for 89% of new capacity (see Figure 1 below). Solar continued to show significant ...

OverviewGovernment incentivesHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryThe China Development Bank provided \$20 billion of financing to domestic solar manufacturers in 2010. In 2011, new feed-in tariffs were promised to potential solar power developers to help drive investments and growth in the solar power market. The government of Qinghai province offered solar projects that were operational before 30 September, 1.15 yuan (\$0.18) for each kWh they produced in May 2011. The National Development and Reform Commission offered same-priced subsidies to potential solar powe...

BEIJING, Jan. 28 (Xinhua) -- China's solar power sector saw steady expansion in 2025, contributing significantly to the growth of the nation's overall power generation capacity, according to data ...

The National Energy Administration (NEA) of China has released the latest official statistics for the country's power generation capacity addition for the period between January and ...

The government incentives have also contributed to the curtailment of solar energy, as many of the solar projects have been built in northern and western regions of China where there is a low demand for ...
