

The International Renewable Energy Agency (IRENA) is an intergovernmental organisation supporting countries in their transition to a sustainable energy future.

Solar thermal energy (STE) is a form of energy and a technology for harnessing solar energy to generate thermal energy for use in industry, and in the residential and commercial sectors.

As a technology innovation-oriented cooperative organization composed of enterprises, universities, and research institutions, the Solar Thermal Alliance brings together the strengths of its member units ...

Concentrating solar power (CSP) systems, also known as solar thermal electricity (STE) systems, are systems that generate electricity by converting solar energy into thermal energy and then converting ...

The Alliance plays a role in organizing, coordinating and serving as a bridge for the research and promotion of solar thermal power generation policy, development of standards, technology research ...

This review highlights key issues in solar thermal energy storage, such as technological, financial, and environmental challenges. It identifies gaps in current literature regarding high ...

Now, a team at Caltech that is part of a Department of Energy (DOE) Energy Innovation Hub known as the Liquid Sunlight Alliance, or LiSA, has developed such a solar-thermal heating ...

Premier Resource Management (Bakersfield, CA), in partnership with the National Renewable Energy Laboratory, will develop a 100-kWe demonstration power plant with more than 12 ...

The Renewable Thermal Collaborative (RTC) is the global coalition for companies, institutions, and governments committed to scaling up renewable heating and cooling at their ...

Find news and information about policies, regulations, business models, technology & market trends in solar heat for buildings and industry.

Solar Thermal Power Generation Technology Alliance
