

Solar panel bottom tiles

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Can you put solar panels on a tile roof?

Unlike a standard shingle or metal roof, a tile roof is a system of interlocking, brittle pieces. You can't just drill through them. Any attempt to mount a solar panel directly onto the tiles will almost certainly lead to cracking, which compromises the roof's primary function: keeping water out. This is the central challenge.

What is a GoodWe solar roof tile?

The GoodWe Sunshine Series is an integrated solar roof tile solution for pitched rooftops to replace traditional solar panels and framework for a sleek, aesthetically-pleasing result, that also maximises your rooftop space for more solar production. The integrated tempered double-glass structure ensures the safety of the roof structure.

Are solar roof tiles better than solar panels?

In addition, while solar panels have a 20-year warranty, solar roof tiles have a 25-year warranty. This shows that solar panels have a high level of durability, while solar roof tiles have a lesser level of durability. However, solar roof tiles cost more than solar panels, which has disadvantages and benefits. How to choose the best Solar Tiles?
