

The production volume of electricity from solar photovoltaic power in the European Union has been steadily increasing in the last years. In 2024, the EU's solar PV power production stood...

This analysis profiles the top 10 solar companies shaping Europe's sustainable energy future through technological innovation, large-scale project deployment, and cutting-edge solar mounting solutions.

A landmark project for Europe's solar manufacturing ambitions is officially underway. Sunwafe has announced the commencement of construction on its massive 20 GW solar silicon ...

Solar energy, in particular photovoltaics (PV), is currently the fastest growing renewable energy source in the EU. Last year, 56 GW of solar PV were installed in the EU, two thirds of it on ...

Explore Europe's 2024 solar boom, with gigawatt-scale projects in Germany, Spain, and beyond driving a historic shift in the continent's energy landscape.

Solar power consists of photovoltaics (PV) and solar thermal energy in the European Union (EU). Solar power is growing in every EU country.

Discover the state of solar panel manufacturing in Europe, the challenges posed by imports, and what EU countries are doing to rebuild local production. Learn how European-made solar can boost ...

This 2026 guide highlights ten reliable European (or Europe-focused) solar panel manufacturers, including AESolar, SoliTek, Bauer Solar, and others, emphasizing sustainability, local ...

The European Union plans a major increase in solar PV capacity from 263 GW today to almost 600 GW by 2030. If nothing changes, this expansion will be based almost exclusively on solar ...

Solar panels from the EU solar plant
