

Solar power generation planning announcement

Gov. Patrick Morrisey has said it will take every form of energy in the portfolio to meet the goal of increasing the capacity of the power grid from 15 to 50 gigawatts by 2050.

Recent AEPS data shows a steep increase in both the number and capacity of solar installations in Pennsylvania over the past two years -- fueled by improving economics, developer ...

"In our most recent monthly inventory of power plants, developers reported plans to bring 32 GW of solar capacity online in the next 12 months (October 2025 through September 2026)," EIA ...

WASHINGTON -- The Department of the Interior today announced an updated roadmap for solar energy development across the West, designed to expand solar energy production in more ...

Governor Kathy Hochul today announced that 6 gigawatts (GW) of distributed solar have been installed across New York, marking the early achievement of the State's Climate Leadership ...

US solar added 18 GW in early 2025, but Trump policies could slash growth by 55 GW by 2030, raising costs and risks, says a new SEIA report.

The projects, supported by President Biden's Bipartisan Infrastructure Law, will deploy geothermal, pumped-storage hydropower, solar, and battery storage and will spur new economic ...

Energy developer China Datang has started operations at the country's first demonstration base for integrated photovoltaic (PV) and concentrating solar power (CSP) ...

U.S. power plant developers and operators plan to add 86 gigawatts (GW) of new utility-scale electric generating capacity to the U.S. power grid in 2026 in our latest Preliminary Monthly ...

We focus on identifying the existence of a tipping point for solar and wind, assuming that no further policy is adopted to usher in a solar and wind-dominated electricity system.
