

Southern Five New Energy Storage

Wilkinson County's 20-year agreement will add 183 MW of solar paired with a 91.5 MW battery energy storage system, enhancing grid reliability through advanced integration of solar plus...

Explore Southern Company's strategic investments and partnerships in battery storage, powering a sustainable and reliable energy future. Learn about their BESS initiatives.

New resources Southern expects to need in Georgia. It is proposing five gas combined cycle units and 11 battery energy storage facilities to meet the need.

Three distinct yet interlinked dimensions can illustrate energy storage's expanding role in the current and future electric grid--renewable energy integration, grid optimization, and electrification and ...

An additional 1,000 MW of new battery energy storage is expected to be procured in the coming years through competitive bidding processes and a 13 MW demonstration project is in ...

With the capacity to store 150 MW of electricity, the facility will have the power to meet the needs of approximately 9,000 homes. This scale of storage will allow SO's unit to better manage the...

Southern Company recently joined industry researchers to launch the Energy Storage Research Center, a facility focused on development of next-generation energy storage technologies.

A new report by Aurora Research, commissioned by the American Clean Power Association, demonstrates a significant opportunity to strengthen grid reliability and lower energy system costs by ...

We expect five other states (Indiana, Arizona, Michigan, Florida, and New York) each to account for more than 1 GW of added solar capacity in 2025 and collectively account for 7.8 GW of ...

Utilizing proprietary energy storage technology developed by battery integrator, Powin, the project can deliver 2 MW of power for over four continuous hours. Millikan was built to provide a quick and ...
