

This pioneer work investigates determining appropriate locations for electric vehicle charging stations in the city of Tunis, Tunisia. More precisely, we are concerned with respecting a ...

Appropriate Electric Vehicle charging infrastructure is crucial for prompting the adoption of EVs. Without wasting public resources while keeping a desired level of user convenience, two ILP models are ...

Tunisia represents a strategic, albeit nascent, frontier in the electric vehicle transition. Unlike the state-driven industrial plays of Southeast Asia or the subsidy-fueled booms elsewhere, Tunisia's EV ...

Optimal planning of electric vehicle charging stations (EVCS) is a solution to these problems. For this purpose, parameters affecting EVCS locations have been determined in the paper.

Tunisia's EV charging infrastructure remains nascent, with an estimated 100 operational public stations as of mid-2025, predominantly concentrated in urban centers like Tunis and Sfax, reflecting a 20% ...

The objective of this study is to determine the optimal placement of EVCS in Tunis City using the proposed MONNA. The performance of MONNA is assessed by comparing it to the well ...

Benoit-Ivan Wansi. In Tunisia, the French oil company TotalEnergies announces the upcoming installation of a recharging network for electric vehicles in the capital Tunis. The initiative is part of ...

Despite the challenges, the future of electric vehicles in Tunisia looks bright. The combination of government support, expanding infrastructure, and increasing consumer awareness ...

Tunisia aims to reach the target of 50 electric cars, 5 charging stations and 50 megawatts of installed power by 2030, compared to the 500 cars, 500 stations and 5 megawatts ...
