

Dr Ruth Briones of Greenergy Solutions, a Philippines-headquartered developer of renewable energy specialised in utility-scale projects, said that Greenergy successfully bid for GEA-1 ...

In the Philippines, battery energy storage systems are still in their nascent stages. While policies like the inclusion of Integrated Renewable Energy and Energy Storage Systems (IRESS)...

We cover the most urgent stories across power generation, renewable energy, policy, and sustainability, with a focus on the Philippine energy transition and its global context.

In order to accommodate energy storage as an enabler for the modernisation of its electricity networks, the Philippines" Department of Energy (DoE) has issued a circular, "Providing a framework for ...

The San Miguel Global Power battery energy storage systems facilities in Limay were inaugurated by the president of the Philippines, Ferdinand R. Marcos Jr., in March 2023.

Nearly 5 GWh of new battery energy storage systems (BESS) will be deployed through hybrid solar-plus-storage projects, signaling the emergence of storage as a core component of the ...

This study aims to identify and assess the economic and financial viability of energy storage applications and deployment in the Philippines. The three main activities of the study are as follows:

The passage of Republic Act No. 11234,entitled "Energy Virtual One-Stop Shop (EVOSS) Act" on 08 March 2019 paved the way for streamlining and expediting the permitting ...

Energy storage systems (ESS) are critical for balancing energy supply and demand, enhancing grid stability, and enabling the integration of renewable energy sources such as solar and ...

By 2031, advanced energy storage systems will play a central role in powering next-generation energy infrastructure in Philippines. Long-duration storage technologies such as ...
