

Vatican rooftop solar panel project

Italian energy company ACEA completed the project in just six months, installing photovoltaic panels on Vatican-owned property outside Rome. The solar array generates enough ...

Solar panels cover the roof of the Vatican's Paul VI audience hall in this photo released by the Vatican in 2008. The hall's original concrete roof was replaced with panels of photo-electric cells, generating the ...

Fast forward to 2025, and the project is completed. Italian energy supplier ACEA installed the photovoltaic roof in just six months in the Courtyard of the Corazze entrance.

The Vatican's solar shift is a culmination of a political and spiritual mission years in the making. In 2024, the late Pope Francis issued an apostolic letter ordering the construction of an ...

A solar panel system is being built on the 424 hectares of extraterritorial land in Ponte Galeria, which within a year will make the Holy See the first zero-emission state in the world.

A new solar panel roof has been inaugurated at the Vatican Museums, part of the Pope's initiative to transition the city-state to 100% renewable energy. Italian energy supplier ACEA ...

One of the most notable solar projects in Vatican City is the solar roof of the Paul VI Audience Hall. The photovoltaic panels installed here generate approximately 300,000 kilowatt-hours of energy annually.

A transparent, luminous solution of cutting-edge technology and energy efficiency, with a modern design and, last but not least, a pleasant visual impact: a model of harmonious and ...

Exclusive 2026 details on the Vatican's model solar roof project. Discover the engineering, exclusive leaks on costs, and how this historic basilica is setting a new green standard for the Church.

Thanks to a unique photovoltaic plant installed on the roof of the Vatican Audience Hall, the Papal State has been producing 300 MWh of solar energy every year since its installation in 2008.
