

Among the key objectives were the upgrade of the power transmission and distribution system, acceleration of the roadmap to build a smart power system, and development of an energy storage ...

Liechtenstein's leading energy storage power station company Samina Power Station, currently the largest of the domestic power stations, has been operational since December 1949. In recent ...

Located in Go Dau, Dong Nai Province, the facility is currently powered by a 220-kilowatt-hour battery energy storage system (BESS) and a 310-kilowatt-peak rooftop solar ...

A green energy subsidiary of Japanese conglomerate Marubeni has brought online a megawatt-scale battery storage demonstration project in Vietnam.

The project is of significant importance to the national power system, particularly as numerous renewable energy plants (solar and wind) with variable stability are being integrated into ...

VinGroup is, in turn, Vietnam's largest trading conglomerate. Another of its subsidiaries, Vinfast Energy, which specialises in the electric vehicle (EV) space as well as stationary batteries, ...

To advance this goal, Vietnam Electricity (EVN) is considering assigning its five power corporations to deploy around 1,200 MW of BESS. Recent policy instruments have established ...

Vietnam's energy storage race is like a game of Tetris: fast-paced, occasionally chaotic, but wildly rewarding if you slot the pieces right. With projects like GoodWe's Haiphong plant and VinES's ...

This study analyses and anticipates the challenges that may arise in frequency stability in Vietnam's power system by 2030, when the renewable energy integration is expected to increase, ...

This will be Vietnam's first pumped storage hydropower plant and one of EVN's key national energy projects this year. The plant is expected to boost national energy security and ...
