

West Energy Storage Equipment

WEST's Supercapacitor-based Modules are the only energy storage devices you will ever need. The WEST product line utilizes our advanced non-chemical storage technology, designed for exceptional ...

The WEST Summit Series batteries utilize advanced hybrid super capacitor storage technology that has major advantages over traditional and well-known electro-chemical energy storage batteries which ...

WEST modules are scalable energy storage building blocks with an expected lifespan of > 30 years. No regular maintenance is required, and the modules can be serviced in the field. Many battery ...

The WEST Energy Exchange is a storage complex that will create and utilize multiple salt caverns to store natural gas, compressed air energy, and various fuels for energy generation.

Wright Energy Storage Technologies (WEST) develops electrostatic supercapacitors with a 45-year design life, 20-year warranty, and zero thermal runaway risk

WEST energy storage solutions set a new standard for performance, reliability, and scalability. With superior efficiency, unmatched longevity, and innovative design, WEST systems eliminate the ...

Wright Energy Storage Technologies (WEST) is committed to accelerating the global transition to renewable energy sources through their innovative energy storage systems.

Whether you're in North America, Africa, or beyond, our team is ready to assist you with your energy needs. Go beyond Lithium-ion with supercapacitor energy storage from WEST. Systems that provide ...

Wright Energy Storage Technologies, with its WEST brand, offers advanced electrostatic energy storage modules, fundamentally different from conventional electrochemical batteries. These modules store ...
