

Where are lion batteries made

Where are lion electric batteries made?

Electric truck, bus, and school bus maker Lion Electric today announced that it's produced its first lithium-ion battery pack at its factory in Mirabel, Quebec. That first battery pack's final certification is expected to take place in the first quarter of 2023, and Lion says it will gradually ramp up production of its batteries next year.

What makes Lion Electric a good battery manufacturer?

To navigate these challenges, Lion Electric is leveraging its battery manufacturing expertise. Inside its automated plant, Lion assembles both medium-duty and heavy-duty battery packs. For years, Lion kept its batteries strictly for in-house use, focused on integrating its high-performance packs into its own electric buses and trucks.

What is lion's battery pack assembly factory?

Lion's battery pack assembly factory is more than a place where batteries are made. It represents the company's new strategy to stay competitive in an increasingly challenging EV industry: becoming an EV battery supplier.

Will Lion Electric become a battery pack supplier?

As Lion Electric faces a major financial crossroads, Electric Autonomy takes a tour around its battery plant where the company hopes to make battery manufacturing the cornerstone of its future.
