

Will Riga's new energy storage be used

Looking to 2030, Riga plans to deploy liquid air storage - essentially bottling winter cold for summer AC use. It's like making snowballs in July, but for real energy savings.

As we approach Q4 2025, Riga's storage capacity is projected to triple, potentially eliminating the need for one natural gas peaker plant entirely. Now that's what we call powering progress!

The addition of two utility-scale battery energy storage systems (BESS) in Latvia marks the final milestone in synchronizing the Baltic power grids with continental Europe, according to the ...

Riga, Latvia - Slovenia's NGEN Group is making a meaningful push into the Baltic energy market with a substantial investment in Latvia. The company is poised to acquire a battery energy ...

As Europe accelerates its transition to renewable energy, the Riga energy storage project has emerged as a pivotal initiative. This large-scale battery storage system is designed to stabilize Latvia's power ...

Summary: The Riga battery energy storage project represents a critical step in advancing renewable energy integration and grid stability in the Baltic region. This article explores the bidding process, ...

Backed by BlackRock's Diversified Infrastructure business, Jupiter Power has a strategic and established portfolio of utility-scale energy storage projects operating or in construction in the U.S., ...

Let's talk about Riga's energy storage revolution - where medieval charm meets cutting-edge battery tech. As of 2025, Latvia's energy storage capacity has grown 300% since 2020, with Riga leading ...

Hanersun has announced the commissioning of a 1.15MWh commercial energy storage project in the Latvian capital Riga. The project, featuring five units of the company's HNESS 230-L ...
