

# Wind Leaf Power Station Planning Map

Optimize your wind energy & solar planning projects, from resource assessment to renewable site suitability to environmental and visual impact analysis.

NextEra Energy invests billions of dollars every year in infrastructure for this and future generations. Hang on a moment while we're loading...NextEra Energy is helping create sustainable energy that's ...

This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the country.

This website is a web application that generates 3D models of wind turbines (KMZ files), which can be viewed in Google Earth Pro on desktop. The primary purpose of this application is windfarm ...

The map combines three open energy datasets and allows visitors to explore global power plants and U.S. solar and wind energy projects using text search and map visualization tools.

Boundaries of renewable energy lease areas, wind planning areas, and marine hydrokinetic planning areas (last file update on 02/05/2025). The following data has been made ...

New high-resolution, state-of-the-art maps of wind energy potential are now available for the Northwest. Resource estimates are easily accessible to the public through an interactive Geographic Information ...

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

This documentation offers practical guidance for mapping wind power infrastructure, with a focus on onshore wind farms and off-shore wind farms. The aim is to ensure consistent, high-quality mapping, ...
