

We report on the experimental observation of vector staircase noise-like pulses (NLPs) produced by an Er/Yb-codoped fiber laser with a nonlinear optical loop mirror (NOLM) as the saturable absorber...

He has applied for nearly 50 domestic and foreign invention patents, published many papers in important foreign academic journals, wrote a MONographs of RF-MEMS, and is a professional reviewer of...

Structural Design and Simulation Analysis of New Photovoltaic Bracket for Temporary Substation

The simulation model of fixed photovoltaic bracket is established by ABAQUS, and the numerical simulation results are compared with the test results. Through parameter analysis, the force ...

Save construction materials, reduce construction cost, provide a basis for the reasonable design of PV power plant bracket, and also provide a reference for the structural design of fixed ...

An effective method is proposed in this paper for calculating the transient magnetic field and induced voltage in the photovoltaic bracket system under lightning stroke.

The application relates to the field of tracking type photovoltaic supports, in particular to a large-span flat single-axis tracking type flexible photovoltaic support system.
